Education

Northwestern University 2026 - 2032 (Expected)
Ph.D. in Industrial Engineering and Management Sciences (IEMS) Evanston, IL, USA
- Focus: Large-Scale Optimization, Artificial Intelligence.

Shanghai University of Finance and Economics 2021 - 2025
Bachelor of Engineering, Pilot Class of Interdisciplinary Sciences Shanghai, China
GPA 3.77/4.0 Average Score 89.55/100 Major GPA 3.87 Major Average Score 91.48/100
Selected Coursework: Advanced Operation Research, Linear and Nonlinear Programming, Probability, Numerical Optimization, Mathematical Analysis, Linear Algebra, Data Structures & Algorithms, Machine Learning & Deep Learning.

Research Interests

Mathematical Optimization, Large-Scale Optimization, AI for Optimization, Language Model Architectures, ML System

Publications

Large-Scale Optimization

- A Restarted Primal-Dual Hybrid Conjugate Gradient Method for Large-Scale Quadratic Programming
  Y. Huang, W. Zhang, **H. Li**, D. Ge, H. Liu, and Y. Ye (2025). **INFORMS Journal on Computing**. [Paper] [Code]
- PDHCG-II: An Enhanced Version of PDHCG for Large-Scale Convex QP
  H. Li, Y. Huang, H. Liu, D. Ge, and Y. Ye (2026). *arXiv preprint.* [Paper] [Code]
- A Scalable First-Order Method for Large-Scale Competitive Market Equilibrium Computation
  H. Liu, Y. Huang, **H. Li**, D. Ge, and Y. Ye (2025). *arXiv preprint.* [Paper] [Code]
- D-PDLP: Scaling PDLP to Distributed Multi-GPU Systems
  H. Li, Y. Huang, H. Liu, D. Ge, and Y. Ye (2026). *arXiv preprint.* [Paper] [Code]
- A Curvature-Aware Rank-Adaptive Distributed Augmented-Lagrangian Solver for Large-Scale SDPs
  H. Li, H. Liu, D. Ge, and Y. Ye (2026). *arXiv preprint.* [Paper] [Code]
- GPU-Accelerated Conic Quadratic Programming with Local Linear Convergence under Strict Complementarity
  H. Li, Y. Huang, H. Liu, D. Ge, and Y. Ye (2026). *arXiv preprint.* [Paper] [Code]

Deep Learning Application

- A Learning and Searching Method for Integrated Process Planning and Scheduling
  H. Li, H. Zhang, Z. He, J. Hu, and H. Yuan (2026). **Production and Operations Management**. [Paper] [Code]
- BenLOC: A Benchmark for Learning to Configure MIP Optimizers
  H. Li, Z. He, Y. Wang, S. Pu, Q. Deng, W. Tu, and D. Ge (2025). *arXiv preprint.* [Paper] [Code]
- FMIP: Joint Continuous-Integer Flow for Mixed-Integer Linear Programming
  H. Li, H. Yuan, H. Zhang, J. Lin, D. Ge, M. Wang, and Y. Ye (2026). **ICLR 2026**. [Paper] [Code]

ML System

- OptPipe: Memory- and Scheduling-Optimized Pipeline Parallelism for LLM Training
  H. Li, H. Zhang, H. Liu, D. Ge, and Y. Ye (2025). *arXiv preprint.* [Paper]
- OSDN: Improving Delta Rule with Provable Online Preconditioning in Linear Attention
  C. Zhou, **H. Li**, Y. Liu, J. Lin, D. Ge, and Y. Ye (2026). *arXiv preprint.* [Paper]

Software

- **PDHCG**: GPU-accelerated first-order solvers for convex quadratic and conic quadratic programming.
- **CARDAL**: A multi-GPU, low-rank augmented Lagrangian solver for large-scale semidefinite programs.
- **D-PDLP**: A distributed multi-GPU first-order solver for large-scale linear programming.

Work Experience

QingTian Lab, Cardinal Operations
LLM & OPT Researcher Feb. 2025 - Jun. 2026
- Developed GPU-accelerated optimization solvers and worked on large language model inference.

Teaching Experience

Shanghai University of Finance and Economics
- Advanced Operations Research (TA) Spring 2024
- Object-Oriented Analysis & Design (TA) Fall 2023
- Programming Peer Tutor Fall 2022

Honors & Awards

- Honor Bachelor Degree, 2025. **(Top 5% in Major)**
- Honor of Excellence Graduation Thesis, 2025. **(Top 3% in Major)**
- Shanghai Municipal Bronze Award in the Internet+ University Student Innovation and Entrepreneurship Competition. **(0.13%)**

Service

Students' Union, SUFE (2021-2022); Campus Return Recruitment Volunteer (Winter 2021).
